Experiment - 11

Online Supermarket System Using Zoho One (SaaS)

Aim

To create a **Cloud-based Online Supermarket System** using **Zoho One / Zoho Creator** to manage customer details, item classifications, product quantities, and supermarket orders, demonstrating Software as a Service (SaaS).

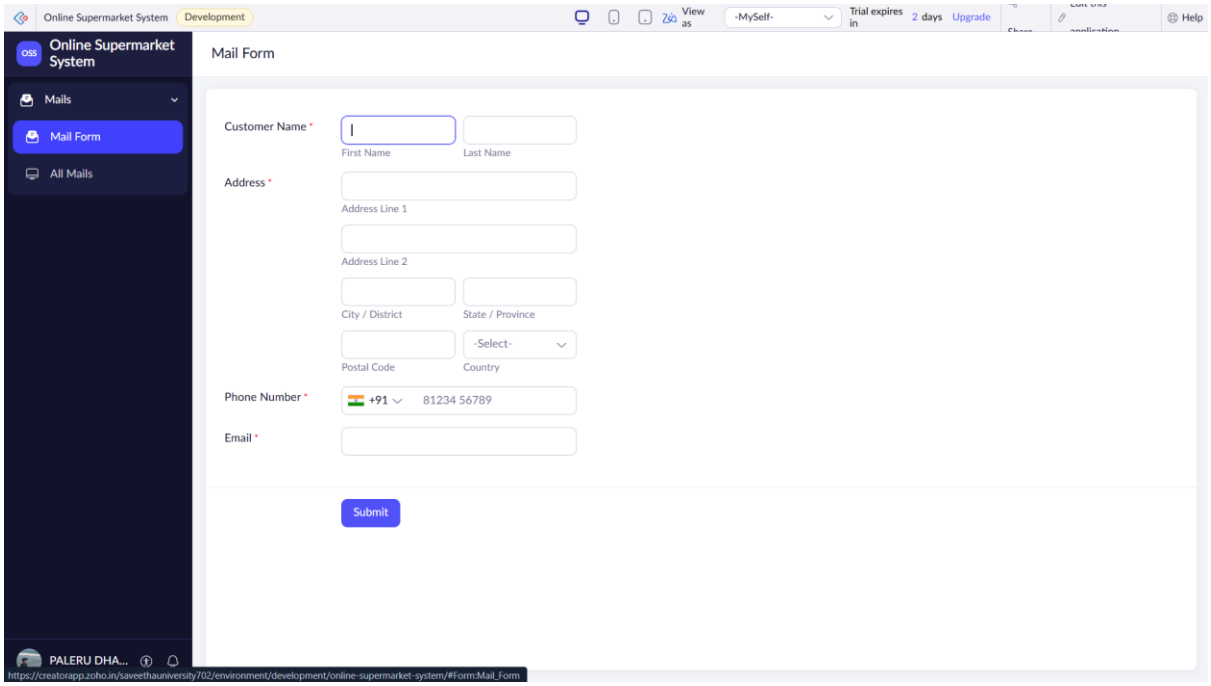

Procedure

1. Log in to your Zoho One account.
2. Open Zoho Creator from the applications menu.
3. Create a new application named Online Supermarket System.
4. Create a form named Customer Details.
5. Add the following fields to the form:
    i. Customer Name – Single Line
    ii. Address – Multi Line
    iii. Phone Number – Phone
    iv. Email – Email
6. Create another form named Item Classification.
7. Add the following fields to the item classification form:
8. Item ID – Single Line
9. Item Name – Single Line
10. Item Category – Dropdown
11. Item Price – Currency
12. Quantity Available – Number
13. Item Description – Multi Line
14. Configure the Item Category dropdown with options such as Groceries, Fruits and Vegetables, Dairy Products, Beverages, Snacks, and Household Items.
15. Create a form named Order Details.
16. Add the following fields:
17. Customer Name – Lookup or Single Line
18. Item Name – Lookup or Single Line
19. Quantity – Number

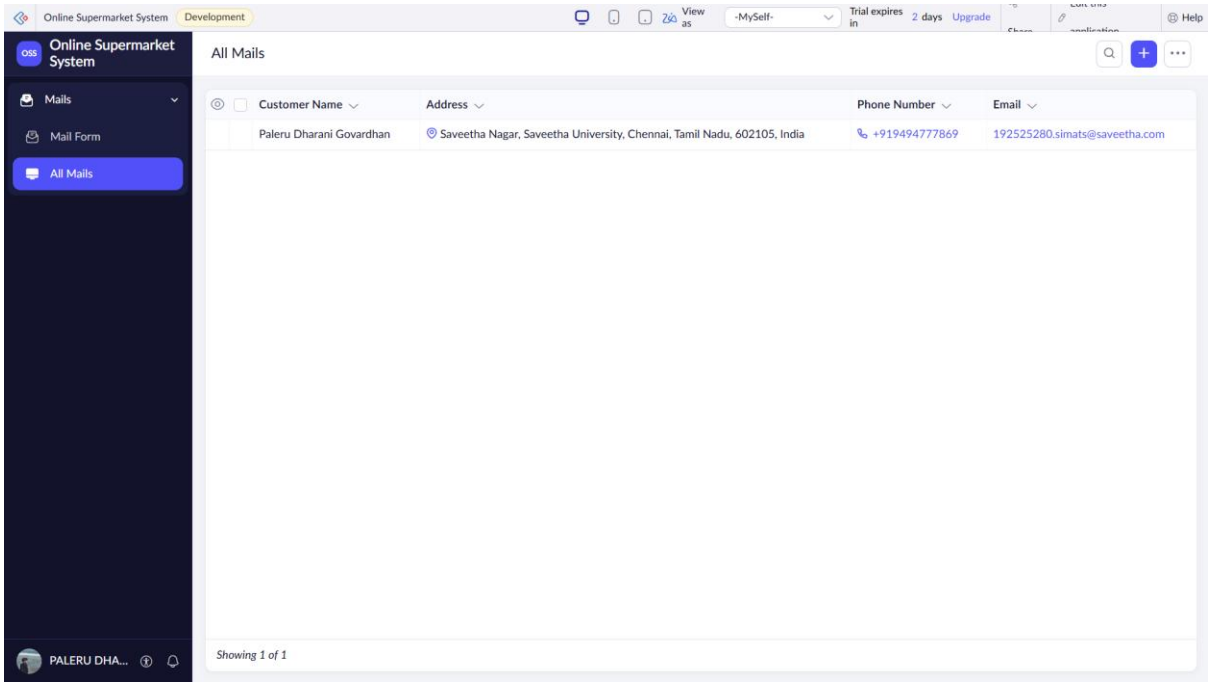

20. Order Date – Date
21. Total Amount – Currency
22. Order Status – Dropdown
23. Configure Order Status with options Pending, Confirmed, and Delivered.
24. Arrange the fields properly and save the forms.
25. Publish the application.
26. Enter sample customer details and item information.
27. Submit an order by selecting an item and entering its quantity.
28. Open the reports section and verify that the customer, item, and order records are stored in the cloud.
29. Test the application by adding different customers and supermarket items.

Implementation

Input:

Output:

Result

Thus, the Online Supermarket System was successfully created using Zoho One / Zoho Creator. The application manages customer information, classifies supermarket items, and records order details in the cloud, demonstrating the Software as a Service (SaaS) model.
