

Experiment -5

Mark Sheet Processing System Using Zoho One (SaaS)

Aim

To create a cloud-based **Mark Sheet Processing System** using **Zoho One** to calculate the total marks and average of a student automatically and demonstrate **Software as a Service (SaaS)**.

Procedure

1. Log in to **Zoho One**.
2. Open **Zoho Creator** from the Zoho One applications.
3. Create a new application named **Mark Sheet Processing System**.
4. Create a new form named **Mark Sheet**.
5. Add the following fields:
 - Name
 - Reg No
 - Department
 - Mark_1
 - Mark_2
 - Total
 - Average
6. Set Mark_1 and Mark_2 as **Number** fields.
7. Set Total and Average as **Number** fields.
8. Create a workflow/form action to automatically calculate the total and average.
9. Use the following **Deluge script** for calculation:

```
total = ifnull(input.Mark_1, 0) + ifnull(input.Mark_2, 0);  
input.Total = total;  
input.Average = total / 2;
```
10. Save the workflow and form.
11. Enter the student's details and marks.

12. Submit the form.
13. Verify that the **Total** is calculated automatically.
14. Verify that the **Average** is calculated automatically.
15. Check the submitted record in Zoho Creator.
16. Thus, the Mark Sheet Processing System is successfully demonstrated as a cloud-based SaaS application

Implementation

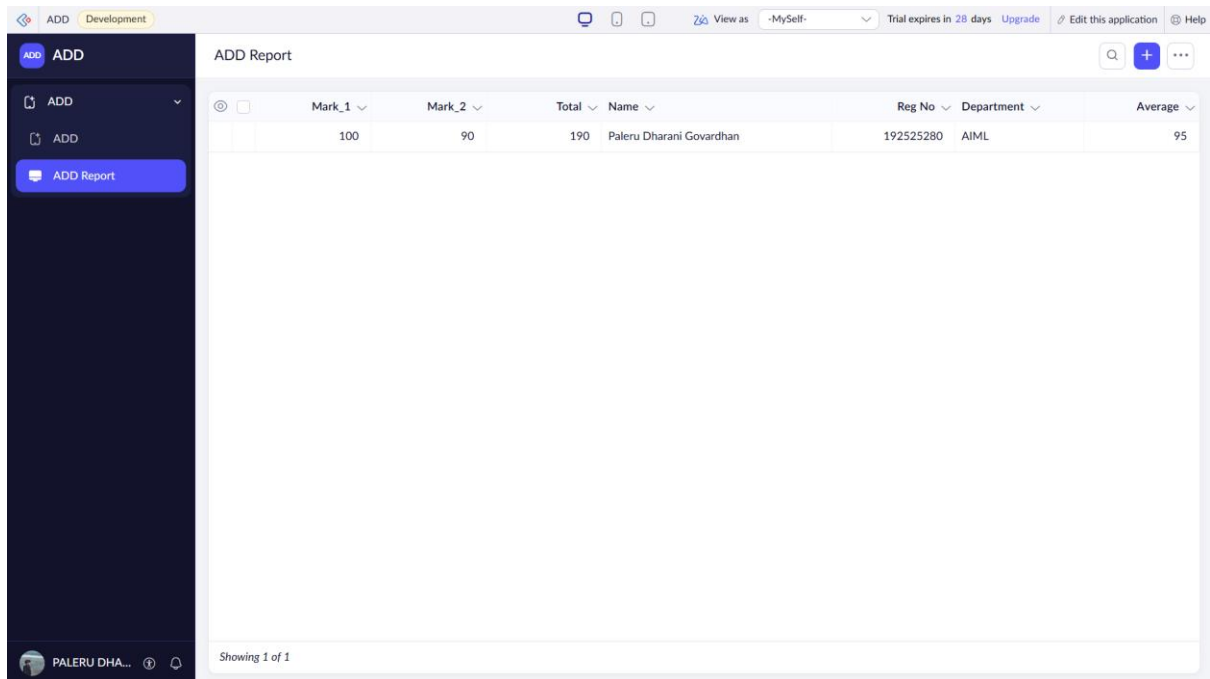

Input:

The screenshot displays the Zoho Creator application interface for the Mark Sheet Processing System. The interface is divided into a left sidebar and a main content area. The sidebar, titled 'ADD', contains a list of actions: 'ADD', 'ADD Report', and 'ADD Report'. The main content area, titled 'ADD', contains a form with the following fields:

- Name: Two input fields for 'First Name' and 'Last Name'.
- Reg No: A single input field.
- Department: A single input field.
- Mark_1: A single input field.
- Mark_2: A single input field.
- Total: A single input field.
- Average: A single input field.

Below the form fields is a blue 'Submit' button. The top of the interface shows the Zoho Creator logo, the text 'ADD Development', and a 'View as' dropdown menu set to 'MySelf'. The bottom of the interface shows the user's profile, 'PALERU DHA...', and a notification icon.

Output:

The screenshot displays a web application interface. On the left is a dark sidebar with a vertical list of buttons: 'ADD', 'ADD', and 'ADD Report'. The main area is titled 'ADD Report' and contains a table with the following data:

Mark_1	Mark_2	Total	Name	Reg No	Department	Average
100	90	190	Paleru Dharani Govardhan	192525280	AIIML	95

At the bottom of the sidebar, there is a user profile for 'PALERU DHA...' and a status bar at the very bottom indicating 'Showing 1 of 1'.

Result

Thus, the **Mark Sheet Processing System** was successfully created using **Zoho One / Zoho Creator**, and the total and average marks were automatically calculated using **Deluge scripting**, demonstrating **Software as a Service (SaaS)**.
