Experiment -4

Library Book Reservation System Using Zoho One (SaaS)

Aim

To create a Library Book Reservation System for SIMATS Library using Zoho One / Zoho Creator as a cloud-based Software as a Service (SaaS) application.

Procedure

1. Log in to the Zoho One cloud platform.

2. Open Zoho Creator from the Zoho One applications.

3. Create a new application named Library Book Reservation System.

4. Create a new form named Library Book Details.

5. Add the required fields:

- Book Title
- Author
- Publication
- Year of Publication
- Edition
- Number of Copies
- Rack Number
- Book Status

6. Configure the field types according to the data required.

7. Add the necessary fields to store book titles, author names, publication details, and publication years.

8. Add the Edition and Number of Copies fields to maintain book information.

9. Add the Rack Number field to identify the location of books in the library.

10. Add the Book Status field with options such as Available, Taken, and Returned.

11. Design and arrange the form for easy user interaction.

12. Save and publish the form.

13. Enter sample library book details into the form.

14. Submit the form and verify that the entered data is stored in the cloud.

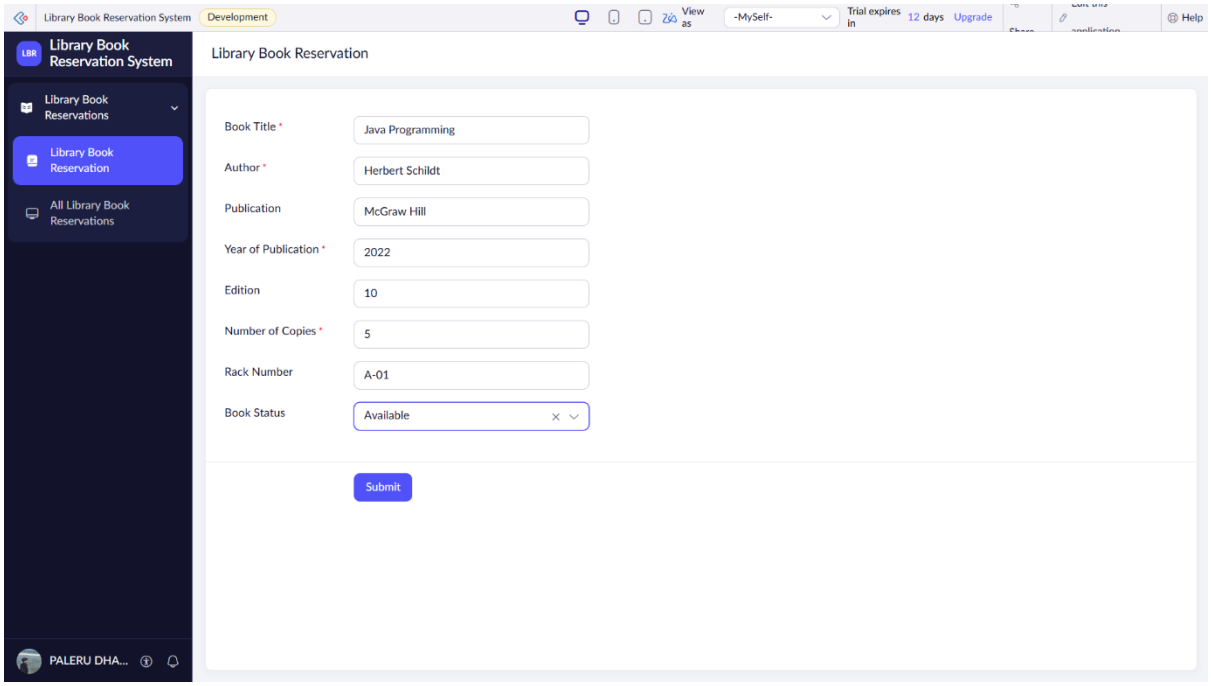

15. Open the report and verify the submitted book records.

16. Test the application by entering different book details and updating their status.

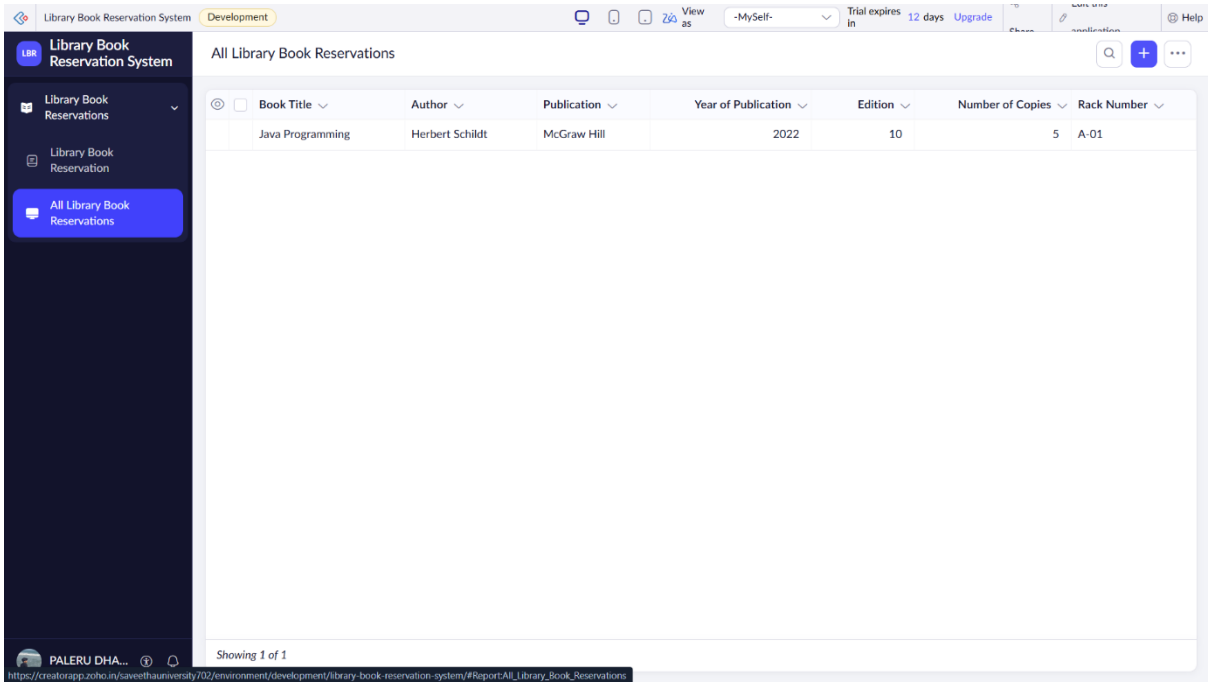

17. Verify that the Library Book Reservation System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Library Book Reservation System for SIMATS Library was successfully created using Zoho One / Zoho Creator and demonstrated as a Software as a Service (SaaS) application.
